

PowerMAX: Hi power, Hi Speed Electronic relay

Hi Power, Hi speed and inbuilt protection. Ideal for use with variable speed motor controllers or just general switching purposes.

Capacity:

> 55 Amps continuously
> 500 Amps briefly

Mounting:

Fully environmentally sealed electronics
Base can be removed and rotated 90° if required

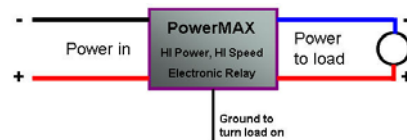

Input:

Input draws very low current (< 0.2mA, TTL and CMOS compatible), ground to turn on relay.

Wiring:

Red- positive supply power into relay (14V)
Black- negative supply into relay (ground)
Red- positive out to load
Blue- negative out to load
White- input signal (ground to turn relay on)
